Think About Your Image...

Codonics is Your Complete Image Distribution Solution

Enhance your image with multi-media alternatives that market your practice and build your business.

The Codonics Horizon Multi-media Imager and Virtua Medical Disc Publisher provide the most comprehensive, economical, image documentation solution available. Use Codonics film for superior image quality, save money and read in room light with convenient grayscale paper, show off your latest imaging techniques on color paper, do surgical planning and templating with our exclusive long film, or send your patient off with their study on CD/DVD.

We take care of your images, and your image.

The world's most versatile imager.

Horizon®

Multi-media Imager

"Allowing referring physicians to select their preferred image formats with speed and efficiency has helped enhance existing relationships and built new business for our radiology department."

John C. Litchney, MBA, RT,
Administrator for The Cleveland Clinic,
Department of Regional Radiology

fading and damage**

Horizon Multi-media Imager - Obsoletes Film-only Imagers

Horizon prints on several sizes of film, grayscale paper and color paper - simultaneously, without operator intervention, all while sitting on a countertop. This cost-effective, multi-media solution provides hardcopy alternatives that allow you to cater to the preferences of your referring physicians and grow your practice.

- **Diagnostic dry film with superior image quality**
- **Room light viewable grayscale paper that saves you money over traditional film**
- **Color paper to attract more referral business**
- **Compact design with the fastest print speed in its class**

Horizon Key Advantages

- A 'true network printer' with up to 24 DICOM connections and no additional hardware required
- The compact size of Horizon allows for our unique, economical Sunrise Express "Swap" Warranty, providing a replacement imager if the problem cannot be solved by our 24/7 support team
- Horizon pays for itself with savings in service costs over a five-year period compared to film-only imagers
- Custom job settings by modality to accurately match monitors
- Validated with all major OEM's, modalities, PACS and workstations
- Models available to suit every need and budget

"We were really impressed by Horizon's quality and speed. Horizon typically prints an entire four-film study before the first film is complete on other 'high-end' imagers. Horizon has really improved our workflow."

A. Joseph Borelli, M.D., MRI at Belfair

A Breakthrough Technology for Digital Orthopaedic Applications

The industry's only dry long film imager, the Horizon XL Multi-media Imager prints digitally stitched images from CR/DR on one, continuous film. Available in two sizes, the 14" x 36" and 14" x 51" film is daylight safe and easy to handle, and folds to fit in a standard film jacket. In addition to long film, the XL prints on standard sizes of film, low-cost grayscale paper and color paper all in the same compact device.

- **Codonics long film is perfect for scoliosis, long bone studies, and pediatric and adult spines**
- **"True-size" imaging up to 51" in length**
- **Horizon XL saves space and eliminates wet film processing**

"The dry long film from Codonics provides the orthopaedic surgeon the perspective and confidence in their measurements and angles, lost with the minified image. It is the perfect solution for our orthopaedic needs."

**Helene Pavlov, M.D., FACR, Radiologist-in-Chief
Hospital for Special Surgery, New York, NY**

Professor of Radiology, Professor of Radiology in Orthopaedic Surgery
Weill Medical College of Cornell University

A revolutionary CD/DVD burner.

"We love the output from Virtua. We love the automated production of the discs and we love the fact that right from the scanner, the technicians can operate it."

Lawrence N. Tanenbaum, M.D., FACR, Edison Imaging
Section Chief MRI, CT and Neuroradiology
New Jersey Neuroscience Institute

Virtua™

Medical Disc Publisher

Virtua is Compact, Fast and Easy to Use - Improves Workflow

Virtua offloads disc recording from the modality and PACS workstations so that patients can be processed without any interruption to the workflow. Its easy-to-use, integrated, design offers a world-class interface unlike any other medical device you've seen before, with an intuitive touch screen that allows novices to become experts in minutes.

- Record DICOM images quickly and effortlessly to CD or DVD
- Distribute images economically to patients, referring physicians and outside facilities
- Automated CD/DVD disc labeling increases productivity and ensures accuracy of patient information

Virtua Key Advantages

- High performance system designed for multiple DICOM workstations to concurrently pool hundreds of studies
- Intuitive touch screen has an easy-to-use interface that optimizes daily workflow
- Use Codonics Medical Image Viewer or select from a host of options, including eFilm™ Lite
- Built-in web server allows users to remotely access and control all functions from a web browser
- Holds 100 CDs or DVDs, or 50 of each
- Disc creation logs assist with HIPAA compliance and automatically generates IHE PDI compliant discs
- Sunrise Express "Swap" Warranty expedites a replacement disc recorder if the problem cannot be solved by our 24/7 support team
- Models available to suit every need and budget

"The first practical CD/DVD burner to really meet our needs. It's so easy to use, we became experts with the system in seconds. We've looked at alternative burners, but none compare."

Norman Y. Schoenberg, M.D. P.C., Spine and Joint Services
